I have graduated from CUET in civil engineering department in 2019. From 2019 to 2023. I have worked in various sectors like pipeline, building construction and hospital project as a senior site engineer and project engineer. Now I'm working as an assistant project manager in Concord Real Estate from 2024. I'm also doing masters in civil and earthquake engineering(Thesis work) dept in CUET. I have the experience in supervision, structural construction, problem solving, analytical and team work.

Professional Experience

CONCORD Group

02/24 - present

Assistant Project Engineer

Construction Project operation

- Supervise day-to-day construction activities, ensuring quality, safety, and project timeline compliance and coordination with contractors, and suppliers for smooth execution of building projects.
- Coordinate with consultant and suppliers to ensure quality and timely project delivery.
- Handled technical queries, ensured construction compliance, and supported the construction team.
- Managed client communication and reported technical progress.
- .
- Support the consultant in developing project execution plans, work schedules, and resource allocation for timely delivery of residential/commercial projects.
- Work closely with architects, structural engineers, and MEP consultants to ensure technical drawings and specifications align with project goals and site requirements.
- Maintain all necessary project documentation including daily progress reports, material reconciliation, RFI logs, and site inspection reports.
- Conduct regular inspections to ensure workmanship and materials comply with quality standards and company specifications.
- Assist in tracking project budgets, managing cost overruns, and recommending corrective measures to stay within approved budgets.
- Enforce safety protocols and monitor site safety practices to ensure compliance wi

M JAMAL AND COMPANY LIMITED

09/21 - 01/24

Senior Site Engineer

First Class Contractor Company of Public Works Department

- Supervised structural works: precast piles, mat foundation, pile cap, retaining wall, basement slab.
- Ensured quality, safety, and adherence to project specs and schedules.
- Coordinated with consultants and monitored manpower deployment.
- Prepared daily, weekly, and monthly progress reports.

Structech Construction And Development Limited

02/21 - 08/21

Project Engineer

Design and Consultancy

- Oversaw project planning, execution, QA/QC, and safety compliance.

- Monitored construction quality, contractor performance, and environmental standards.
- Managed documentation, reporting, and material estimation.

Crescent Associate Limited**12/19 - 11/20****Site Engineer**

Subcontractor (Pipeline)

- Supervised pipeline works: welding, trenching, backfilling, and coating.
- Conducted hydrostatic tests, level surveys, and ensured safety regulations.
- Managed resources, recorded progress, and resolved on-site technical issues.

Education

Chittagong University of Engineering and Technology**06/22 - present****Masters Of Engineering In Civil And Earthquake Engineering - Ongoing (thesis project)**

- Seismic design, vibration control, earthquake hazard assessment.

Chittagong University of Engineering and Technology**01/14 - 06/19****Bsc In Civil Engineering - 2.59**

- Civil Engineering design and construction, structural analysis and design.

Omar Gani M E S University College**01/11 - 12/12****HSC - 5.00**

- Science

Nasirabad Government Boys High School**01/09 - 12/10****SSC - 5.00**

- Science

Projects

Auditing Carbon Emission From Road Transport Vehicle In CTG City**01/18 - 12/18**

- Auditing the emission means the year based emission of carbon dioxide in Chittagong city. I have selected 2017 as the base year and I have selected 12 Major roads of Chittagong city as study area. Then I calculated the road length using Google Map. Then I have determined Annual Average Daily Traffic (AADT) by using expansion factor. Using Equation and with the help of the emission factors, I have determined emission of carbon dioxide in free flow condition, peak and off peak condition.

Father's Name And Profession

- MD MANIK ; Service Holder

Mother's Name And Profession

- Mrs SHAHANARA BEGUM; Housewife

Nationality

- Bangladeshi

RELIGION

- ISLAM

Key Skills

- Leadership, management, team Work, technical support, technical development, technical competence, engineering management, field inspection, construction safety and control, analytical ability, technical coordination, project engineering, project management, communication, project delivery, project assurance, quality control, manufacturing process improvement, customer satisfaction, confidentiality, inbound marketing, telecommunications, client relationship, problem solving, analytical skills, presentation skills, contract negotiation, real estate, interpersonal skills, negotiation, real estate sales, sales strategy development, building materials, documentation, project engineering, site supervision, procurement, professional manner, project estimation

Interests

- Sports, Gardening, Travelling, Team Work, Seminar
