## ABOUT ME

Quality Management professional with 14 years of experience in maintaining and improving standards across product development and service delivery. Skilled in inspections, testing, and data analysis to drive continuous improvement. Known for precision, strong communication, and adaptability across diverse work environments.

## EXPERIENCES

### ABWA Cables Pvt Ltd

#### Production & Quality Manager

July 2022 – Present

- Leading production and quality operations to ensure compliance with industry standards and customer expectations.
- Implementing process improvements and quality control systems to enhance product reliability and reduce defects.
- Coordinating with cross-functional teams to streamline production workflows and resolve quality-related issues.
- Supervising quality audits, managing documentation, and ensuring adherence to safety and regulatory requirements.

### New Generation Cables (NGC)

#### Quality & Production Manager

September 2020 – June 2022

- Managed end-to-end quality and production processes, ensuring consistent product performance and customer satisfaction.
- Developed and enforced quality assurance protocols and corrective action plans.
- Oversaw raw material inspection, in-process checks, and final product evaluations.
- Led team training initiatives to improve operational efficiency and product quality.

### Fast Cables Pvt Ltd

#### Assistant Quality Manager

January 2010 – August 2020

- Planned, controlled, and ensured product quality as per standard specifications to meet customer requirements.
- Monitored production processes, batch costing, and compliance with standards.
- Identified quality-impacting issues and proposed data-driven solutions.
- Controlled raw/packaging material quality to ensure zero defects in final products.
- Maintained liaison with connected units for smooth factory operations.
- Conducted random audits to evaluate product reliability and consistency.
- Managed customer complaints through stability testing and corrective actions.
- Supervised and motivated floor workforce on quality, safety, and productivity.
- Updated process manuals and specifications based on practical data.
- Preserved QA documentation and SAP-ERP data for traceability.
- Analyzed deviations and submitted root cause reports with solutions.
- Performed additional duties as assigned by management.
