UAE and India Leading Global Climate Action: A Journey from G20 to COP28

Dr. Sultan bin Ahmed Al Jaber, the Minister of Industry and Advanced Technology and President-designate of COP28, addressed the 'From G20 to COP28: Energy, Climate, and Growth' forum in Abu Dhabi on Sunday. He emphasized the role of multilateralism in achieving climate targets set for COP28 in the UAE.

During the special forum, Dr. Al Jaber highlighted the shared vision of the UAE and India for an energy transition aligned with sustainable socio-economic development. He commended India, the current G20 Presidency, for its energy transition vision, emphasizing the significant opportunity for economic development through a joint focus on renewables. The UAE, a pioneer in renewable energy, is home to some of the world's largest solar projects and a major global investor in the sector.

Expressing gratitude to India's leadership for the G20 Delhi Declaration and progress in core climate actions, Dr. Al Jaber praised Prime Minister Narendra Modi's commitment to cooperation and multilateralism. He outlined COP28's goal of framing climate action as an opportunity for growth, with a focus on ambitious and balanced outcomes through the first-ever Global Stocktake across mitigation, adaptation, and means of implementation.

Dr. Al Jaber acknowledged the need for a "new paradigm" in climate finance to ensure low-carbon development across the Global South, emphasizing the importance of rebuilding trust between North and South. He called for the fulfillment of unmet promises, including the \$100 billion pledge, replenishing the green climate fund, doubling adaptation finance, and operationalizing the fund for loss and damage at COP28.

Highlighting Prime Minister Modi's commitment, Dr. Al Jaber urged a transformation of the broader climate finance landscape, with International Financial Institutions and Multilateral Development Banks reframing their mandates. He stressed the necessity of more concessional funding to attract private capital, efficient voluntary carbon markets, and innovative models of blended finance for emerging and developing economies.

Dr. Al Jaber underscored the importance of making clean technologies accessible and affordable across the Global South, emphasizing a rebalancing of climate finance to prioritize adaptation alongside mitigation. He noted the outcome of the UNFCCC Transitional Committee on Loss and Damage, providing recommendations for implementing the Loss and Damage Fund at COP28.

Looking ahead, Dr. Al Jaber outlined the comprehensive agenda for COP28, urging delegates to demonstrate that multilateralism still works. He called for replacing discord with solidarity, bringing positivity to climate deliberations, and restoring hope through united climate action.

Virat Kohli takes first ODI wicket in nine years at World Cup

India's Virat Kohli celebrates the wicket of Netherlands' captain Scott Edwards during the match in the Cricket World Cup at M.Chinnaswamy Stadium in Bengaluru on Sunday.

Iyer and Rahul Centuries Maintain India's Unblemished Record, While Kohli and Rohit Claim Crucial World Cup Wickets

Bengaluru: A remarkable display of batting prowess by Shreyas Iyer and KL Rahul propelled India to a commanding 160-run victory over the Netherlands in a World Cup match at M. Chinnaswamy Stadium on Sunday. With this win, India concluded the group stage with a perfect record of nine wins in nine games.

Iyer's unbeaten 128 and Rahul's 102 formed a formidable partnership, contributing to India's imposing total of 410-4. In a dominating performance, India utilized nine bowlers, including Virat Kohli and Rohit Sharma, to dismiss the Dutch for 250 in the concluding league match of the tournament in Bengaluru.

The victory secured India's spot in the semi-finals, where they are set to face New Zealand in Mumbai on Wednesday. The second semi-final will feature Australia and South Africa the following day in Kolkata.

Iyer achieved his first World Cup century in a match where all of India's top-five batsmen surpassed the fifty-run mark on a pitch favoring batsmen. He reached his hundred, the fourth in his ODI career, off 84 balls, concluding with 10 fours and five sixes.

Rahul, born in Bengaluru, achieved the fastest Indian hundred in World Cups, reaching the milestone in just 62 balls. Despite his rapid century, he departed four balls later as India fell short of their highest-ever World Cup total.

Kohli, who reached his half-century, fell for 51, missing the anticipated 50th ODI ton. Skipper Rohit and Shubman Gill set the stage for the total with an opening stand of 100, both making significant contributions.

In the bowling department, Kohli claimed a wicket with his gentle medium-pace after a nine-year hiatus from ODI wickets. Rohit, using his part-time off-spin, contributed to the team's success, picking up crucial wickets as the Dutch innings folded in 47.5 overs. Kohli's delivery accounted for opposition captain Scott Edwards, caught behind, marking his fifth career ODI wicket and the first since 2014.

The Dutch struggled to keep pace with the required run rate, losing wickets at regular intervals. Despite efforts from Sybrand Engelbrecht (45) and Teja Nidamanuru (54), India's comprehensive bowling performance ensured a resounding victory. Rohit, with his part-time off-spin, accounted for the dismissal of Nidamanuru, securing India's dominance in the match.

India's KL Rahul celebrates with Shreyas Iyer after reaching his century during a World Cup match against Netherlands at M. Chinnaswamy Stadium in Bengaluru on Sunday.

Dubai Taxi Transitions to Joint Stock Company in Preparation for IPO

Dubai Taxi is set to undergo a significant transformation into a joint stock company, paving the way for a potential initial public offering (IPO). The move comes as His Highness Sheikh Mohammed Bin Rashid Al Maktoum, Vice-President and Prime Minister of the UAE, and Ruler of Dubai, issued a law formalizing this change.

The law, issued on Sunday, not only facilitates the conversion of Dubai Taxi into a joint stock company but also approves the offering of its shares to the public for subscription when they are officially issued. In tandem with this development, Sheikh Hamdan bin Mohammed bin Rashid Al Maktoum, Crown Prince of Dubai and Chairman of the Executive Council, endorsed the council's resolution No.93 of 2023, which approves the statute of Dubai Taxi Company and authorizes the public subscription of its shares.

This resolution outlines key details such as the articles of association of Dubai Taxi Company PJSC, specifying rules, provisions, and the determined percentages for public subscription, as mandated by the emirate's Executive Council. Additionally, the resolution defines the company's objectives, terms of reference, mechanisms for appointing and electing its board of directors, and other regulations governing its operations.

To establish the leadership structure for the newly transformed company, Sheikh Hamdan issued the council's resolution No. 92 of 2023, forming the board of directors of Dubai Taxi Company. Abdul Mohsen Ibrahim Younis will serve as the Chairman, with Ahmed Ali Al Kaabi as the Vice Chairman. Other members of the board include Shehab Hamad Bushahab, Yousef Ahmed bin Ghalaita, Dr. Hanan Suleiman Al Suwaidi, Abdullah Mohammed bin Damithan, and Issa Abdullah bin Natuf.

In accordance with the law, Dubai Taxi Company now supersedes Dubai Taxi Corporation in all applicable laws within the emirate, assuming all powers vested in the Corporation under existing legislation. This comprehensive legal framework sets the stage for the company's transition to a joint stock entity and marks a significant step towards its potential IPO.

Dubai Resident Transforms 300kg of Plastic Waste into a Luxury Table Valued at Dh21,000

After transitioning from a mechanical engineer to a furniture craftsman eight years ago, Chinara Darwish is making waves with her innovative approach to plastic waste. Unlike most people who see plastic in the garbage as mere trash, Chinara sees potential and value in repurposing these materials into luxurious furniture pieces.

At the ongoing Dubai Design Week in the Dubai Design District, Chinara unveiled her inaugural creation – a limited edition luxury dining table valued at Dh21,000. This exquisite piece is exclusively crafted from discarded marine, industrial, and construction plastic waste, delivering a powerful message about turning what others consider waste into something aesthetically pleasing and valuable.

Chinara, who believes in the significance of limited editions over mass production, aims to transform waste into luxury items. Her commitment to sustainability is evident in her latest masterpiece, with each table weighing over 190 kilos and utilizing more than 300 kilos of recycled plastic waste.

Only 10 of these unique tables will be produced, making them not only super exclusive but also environmentally friendly. Chinara emphasizes her mission to repurpose different types of waste, including materials from the sea, construction sites, and industries, into distinctive and special pieces.

Supported by her family's construction business, Chinara sources waste plastics and other materials, such as road barriers, marine waste, and water tanks, from across the UAE for her projects. In her workshop, she undergoes a creative and scientific process, experimenting with colors, shredding, and heating plastic to create unique hues. The challenge lies in making recycled materials radiate luxury, but Chinara's dedication to artistic and technical excellence shines through.

The showcased dining table is just the beginning of Chinara's ambitious plan to transform waste into sought-after items. Every element of her creations is locally crafted, aligning with the UAE's initiative for sustainability and earth-friendly choices. Chinara looks forward to featuring her products at COP 28 in Dubai this year, contributing to the call for sustainable practices and recycled materials in art and design.

Dubai Airshow 2023: Is there an Aircraft Ordering Frenzy Among UAE and Saudi Airlines?

Emirates, flydubai, and Riyadh Air are potentially gearing up for significant aircraft bookings as the latest edition of the Dubai Airshow commences. With over 1,400 exhibitors, including 400 first-time exhibitors and 80+ startups, unveiling innovations, the spotlight is on these three carriers and their potential fleet expansion orders.

The demand for modernizing fleets with fuel-efficient aircraft to meet the sustained resurgence in global travel is driving interest in new wide and narrow-body aircraft. Emirates President Tim Clark anticipates receiving the long-delayed 777-9 version between July and October 2025. flydubai, exploring options from both Airbus and Boeing, is considering a new order of narrow-body aircraft. Riyadh Air, having already announced orders for long-haul Boeing 787s, is now looking to finalize its order for a short-haul fleet.

At the 2021 event, Airbus secured 404 orders, while Boeing received 101. Aviation industry analyst John Strickland suggests that manufacturers may make new announcements at the Dubai Airshow, emphasizing the potential for Emirates, flydubai, and Riyadh Air to contribute to record-breaking aircraft orders.

Emirates, despite announcing record half-year results, is expected to look beyond existing orders to meet its needs in the next decade. Riyadh Air, a new Saudi airline, may announce an order for up to 100 Boeing 737 MAXs, with expectations of a firm order for 50 737 MAXs and options for an additional 50.

Despite supply chain challenges, regional carriers may still be in the market for new aircraft. Linus Bauer, Managing Director of Bauer Aviation Advisory, suggests that airlines could opt for smaller orders and focus on manufacturers demonstrating better resilience in handling supply chain issues.

With narrow-body, fuel-efficient aircraft being a top priority for sustainability goals, regional airlines are making strides in this direction. The Dubai Airshow is expected to provide insights into the future of the aviation industry, with potential aircraft orders shaping the landscape for the coming years.
